

## Free Computer Games

When the computer game revolution began, users were enthralled with the amazing new technology, but not so much with the selection. The industry was young, and there were relatively few computer games to choose from. Then, as popularity grew and technology advanced, the number of available computer games began to increase.

Today, entire teams of programmers, game designers, musicians and artists collaborate to make the industry fun, exciting and profitable. There are literally thousands of themes and titles readily available for virtually every imaginable genre. Game prices average at \$40 or more. Big marketers of computer games now offer "shareware", or sample software that lets users try it before they buy it.

Another money-saving option for computer game fans is the option to play games online for free. There are so many free computer games available to play online, it's guaranteed that you'll find something you like. From basic to advanced, easy to skilled, classic titles to hot new releases, you'll find what you need for some free fun online. There are so many titles available online, you have to wonder why they are there for free.

Hundreds of free computer games are online. Here is just a sample of what's available to download or play:

- \* America's Army: Your mission is to surpass the rainbow six series. The subject of this online computer game is about busting terrorists.
- \* Beneath a Steel Sky: An outstanding racing game with interesting details to keep the player occupied.
- \* Colossus: Powerful mythical creatures capture player's hearts. Kids to college geeks.
- \* Falcon's Eye: Great graphics. You don't want to miss any of these details.
- \* Grand Theft Auto (and its sequels): This game conquered the world big time, and it's available free online.
- \* Orbiter: A space shuttle flight simulator that can handle anything on earth, or in outer space. Interesting effects.
- \* Return to Castle Wolfenstein: Thirty-two players battle in a campaign pitting their skills against each other. Part of the game is the introduction of new characters that are vital to the teamwork that is a part of the game.
- \* Stair Dismount and Truck Dismount: This is an insane game that keeps players preoccupied. Do the most possible damage to a crash test dummy by placing it in front of a speeding truck or kicking it down a flight of stairs.
- \* Steel Panthers; World at War: This may be the best tactical game about WWII.

Here are some other free computer games that are worth looking into:

- \* Ancient Domains of Mystery Pekka Kana 2, and Abuse 2: Games for side scrolling action lovers.
- \* The Ardennes Offensive: Great interface, good strategy. Vantage Master Online--Free computer game on RPG.
- \* Little Fighter 2: A little fighter gets involved in big battles.
- \* Notrium: Solve puzzles to escape a hostile planet.
- \* Stick Soldiers 2: Not the most sophisticated graphics, but still a great play.
- \* Wazza: Perfect for anyone who wants to play like an outer space pirate.

Every computer game that becomes available has a market segment that it aims to capture. Depending on how they're perceived, every game offers good play. The best part is, now you don't have to buy every game that interests you. Sooner or later, it can come out in the free computer games section.

Personal computers are constantly being upgraded to be faster, stronger and with better video and sound capabilities. These upgrades are not to help people in their occupations or daily tasks, but to be able to handle all of the new game software that's constantly hitting the market.

When a new game becomes available that you just can't wait to try, hold on for just a little while. It will soon be

available to play free on your computer, and with today's advanced technology, it will definitely be worth the wait.
